PROFESSIONAL SUMMARY

Self-taught Full Stack Developer from Brazil with **3+ years of professional experience** in enterprise ERP development using **Delphi and SQL**, currently working as a **Mid-Level Delphi Developer** at Viasoft. Complementary expertise in modern web technologies including **TypeScript, Next.js, and REST API design**. Currently pursuing a Bachelor's degree in Software Engineering while continuously building real-world projects. Highly motivated, resilient, and passionate about delivering clean, practical solutions. Fast learner who started programming at 29 and reached professional level within a year.

WORK EXPERIENCE

Mid-Level Delphi Developer

Aug 2025 – Present

Viasoft · Brazil

- Develop and maintain enterprise ERP modules in Delphi at mid-level capacity, delivering new features and system improvements in a structured product environment.
- Design and optimize complex SQL queries, ensuring data integrity and performance across large-scale database operations.
- Integrate internal modules and external services via REST APIs; use Postman for endpoint testing and validation.
- Collaborate with cross-functional teams in an agile workflow, contributing to sprint planning, code reviews, and technical deliverables.

Delphi SQL REST API Postman ERP Git

Junior Delphi / ERP Developer

Jan 2022 – Aug 2025 · 3 yrs 7 mos

Silbeck · Brazil

- Built and maintained enterprise ERP modules in Delphi, covering core business processes across multiple client deployments.
- Wrote and tuned SQL queries on Firebird databases; diagnosed and resolved critical production issues ensuring system continuity.
- Integrated internal ERP components with external services via REST APIs and developed new functional modules based on business requirements.
- Progressed from junior to a consistent mid-level contributor, gaining deep domain knowledge in ERP architecture and Delphi ecosystems.

TECHNICAL SKILLS

Languages & Frameworks

- Delphi (Professional)
- TypeScript / JavaScript
- Next.js 14 / React
- Java (Intermediate)
- HTML5 / CSS3 / Tailwind CSS

Databases

- Firebird (Advanced)
- SQL / SQL Server
- Notion API (as DB backend)

Tools & Platforms

- Git / GitHub
- Postman / REST APIs
- Vercel (deployment)
- Node.js / NextAuth.js

Concepts

- RESTful API design
- JWT authentication
- Mobile-first / PWA
- Agile / Kanban

KEY PROJECTS

Personal Finance App

Live

Mobile-first PWA for personal finance management built with Next.js 14 and TypeScript. Features an interactive dashboard with charts, income/expense tracking, financial goals, and a stock portfolio tracker. Uses Notion as the database backend via API, with secure authentication powered by NextAuth.js and deployed on Vercel.

Next.js 14 TypeScript Notion API NextAuth.js Tailwind CSS Vercel

devarthurramos.com.br — Portfolio + Private Area

Live

Personal portfolio site with a fully integrated private area accessible via login. Public section showcases professional experience and projects in both English and Portuguese; the private section hosts personal productivity tools. Built with Next.js and hosted on Vercel with a custom domain.

Next.js TypeScript Vercel NextAuth.js

EDUCATION & LANGUAGES

B.Sc. Software Engineering (in progress)

2026 – 2030

Estácio — Brazil

Full-time undergraduate covering software architecture, algorithms, databases, web systems and agile methodologies.

DIO University Ambassador

2022 – 2023

Digital Innovation One (DIO)

Completed courses in Java, REST APIs, Git and web development. Recognised as community ambassador for active contributions.

Portuguese

Native · C2

English

Intermediate · B1

Additional Info

- Available for remote work (any timezone)
- Open to relocation opportunities
- Started programming at 29 — strong self-learning track record
- Builds personal projects actively to expand tech stack
